

### Task 3) Discussing the proposal with the tutor and peers

For the project, I decided to design and build a responsive and progressive website for a made-up clean skincare brand named “Kuritsuku”. The website will have different pages, such as a home page, an about us page, several product pages, a checkout page, and so on. I’ve discussed the project detail with two tutors, Shang Gao and Nisha. They had approved of my idea and had been kind enough to give me feedback as to which aspects of the proposal I should improve. In addition, I also discussed my project proposal with my friend, Kartik. We did a couple self-study sessions together to share ideas and inspire each other for our own proposal.
